

How to prepare for Interviews & Strive in your career

Fiona Johnson & Dishank Raj

Institute of Actuaries of India

Interview Preparation

CV Preparation

- Use the right format, highlight key information, maintain accuracy

Research

- Find out about the company, its culture, market positioning and employee feedback

Compare

- Compare your skills with the job requirements

Non-verbal communication

- Positive behaviour & body language is equally important. Be mindful about your social media activities <https://www.youtube.com/watch?v=PCWVi5pAa30>

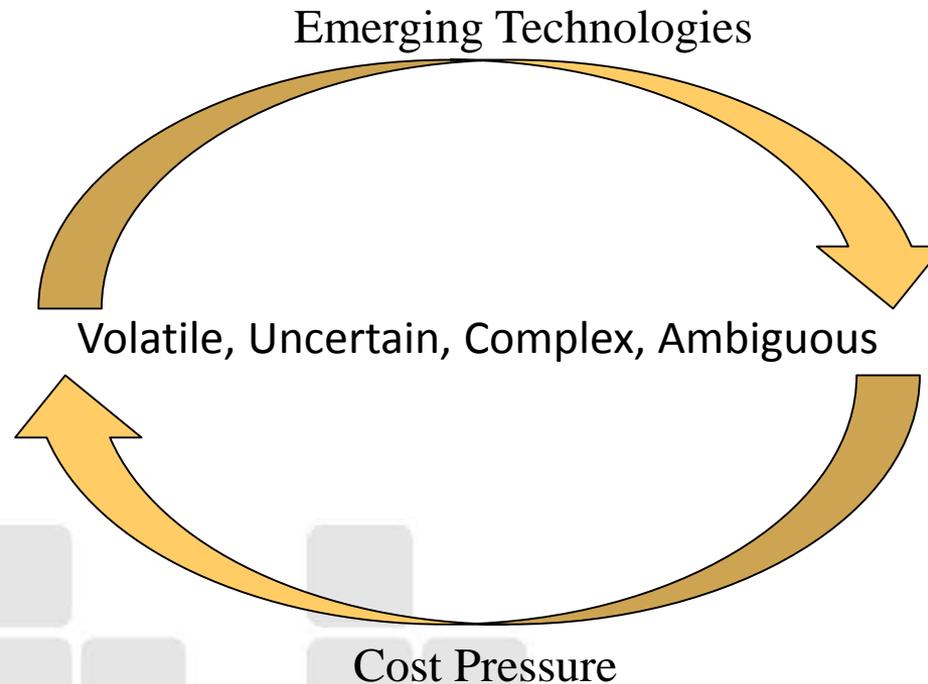

Engage

- Ask clarifying questions and clear any doubts you may have

How to strive in your career

Today's Business Scenario

Contd..

Insurance sector is going to change in the near future as a result of scientific advancements in the areas of machine learning and predictive analytics. It has been forecast that the bulk of manual actuarial modelling will be replaced by machines.

Telematics – This technology has been running for sometime now specially in the US and UK, mainly in context of pricing car insurance based on driver's driving style

Big Data & Predictive Analytics

Artificial Intelligence

Robotics

What do we need to do

- Bring Unique & Fresh Perspective
- Commercial/Business/Industry Awareness
- Effective Communication
- Problem Solving
- Stay Inquisitive
- Networking
- Build Proactive Solutions

Contd..

Life in the Insurance sector is changing, but the humans will still control the machines – for as long as we can predict.

Make sure to take the time to stay up to date with machine learning techniques, because without it, you run the risk of becoming an actuarial dinosaur!
