## Formulae

If formulae are numbered, do so consecutively after each formula with the number placed in brackets e.g.  $E(X) = \int x.f(x) dx \dots (1)$

## Acknowledgements

Often authors like to include acknowledgements to those who have helped them in the development of their paper. These should appear at the end of the main text. e.g.:

We are most grateful to the XYZ for their help and funding of this paper.

## References

References in the text should be in the form:

Top & Bottom (2001) or

If there are two authors '&' should be used between surnames, if more than two, only the first named author's surname should be used followed by *et al.*, see above example.

Place brackets around the year if appearing in the text, if appearing within bracketed comments, a comma should follow the authors' names before the year, see above examples.

## List of references

The full references must be given in this section and ALL references must be cross-referenced within the text. References are in alphabetical order by first author, and in date order for any one author. If URLs are given, the date of access must be shown.

## Appendix(ces)

Appendices must follow the references.

## Figures, tables and illustrations

When using figures, tables and illustrations throughout the paper, please follow these guidelines.

### General guidelines

- a. All figures and tables should be numbered throughout the paper, and should have a heading or caption.
- b. Please use explicit references to the figures and tables in the text (e.g. 'see table 4'). Avoid words like 'above' and 'below', as after typesetting the figures and tables might not appear as they do in the manuscript.
- c. All figures should be supplied as separate files. Please do not embed the figures in the text.
- d. Please ensure that the material you submit is of the best possible quality e.g. avoid using tinted panels or surrounding borders, the range of tints in grey scale illustrations should be above 15%.
- e. Maths labels should be typed exactly as they appear in the text. For Example if a symbol appears in italic in the text or equation, it should also appear in italic in the figure. All fonts should be embedded.
- f. Common packages such as Adobe Illustrator have options which allow you to output to TIFF or EPS, and we would prefer it if you could supply your files in this format.
- g. Submit figures sized to fit the actual column or page width of the journal so that reduction or enlargement is not necessary. Note that some software packages are generally NOT suitable for conversion to print reproduction, and these include:
  - Microsoft PowerPoint files
  - Images created in Microsoft Word
  - GIFF images downloaded from the web
