

Gain a global perspective

Milliman is seeking actuarial data analyst with strong analytical, problem solving, technical, and communications skills to join our predictive analytics team within our Life practice, based in Gurgaon. Seize this opportunity to work closely with other actuaries, statistical modelers, data scientists / engineers, and software engineers from across the globe in a dynamic, challenging and rewarding environment.

REQUIREMENTS

- Basic actuarial domain knowledge of life and annuity products
- Passed one or more actuarial exams
- Proficiency developing scripts for data manipulation (Python required)
- Experience with SQL and data retrieval
- 0 – 1 years of professional work experience

GET READY TO MAKE A DIFFERENCE

Please upload your applications along with a detailed Curriculum Vitae at <https://tinyurl.com/yckr3btt>

Shortlisted candidates will be invited for an entrance test / interviews in January 2022.
